The Numerology of Money

There is an ancient art of prediction and self-awareness based in numbers. This is called numerology and can be very useful for making decisions and understanding the energy of your personality, life purpose and what motivates you. Numerologists believe that the numbers 1 through 9 have specific characteristics, each one different and having a unique effect on the individual ruled by that number.

This is also true for money and abundance. This is not the same as 'lucky number' this is the spiritual vibration and energy that your birth number and how it affects your ability to attract and pass on money. First work out your Birth Number (which is also your Money Number) and then look at what your number says about you financially.

How to work out your Birth Number:

First write out your birthday as numbers Example 27 October 1957 = **27 10 1957**.

Now add together each section of the numbers, if the result is higher than 9 add the numbers together again eg: **2+7=9; 1+0=1; 1+9+5+7=22, 2+2=4.**

Add together all these totals: **9+1+4=14, 1+4=5.**

This person's birth and money number is **5**

Number One 1

People with 1 as their money number will most likely have good money luck throughout their lives. However, 1 is also the energy of 'new beginnings', so you may find yourself forever starting new things and not getting the advantages of long term commitment. A Number 1 person is unlikely to be in debt for long as money made and earned tends to stay with the person who made it in the first place.

Number Two 2

Number 2 is traditionally not thought of as being lucky in finances. The number 2 does not reflect 'wealth' as the energy is all about sharing and of giving to others – which is good for the soul but 2's need to be careful that they don't put themselves last and get left with nothing themselves. Number 2 is can be overly generous to the point of it becoming a 'flaw'. Beware a love of luxury unless you can pay for it.

Number Three 3

Number 3 is a naturally lucky vibration that is able to make money easily. However, the saying “easy come easy go” was written for this number, making saving a non-event. Although money comes in, actually building up capital and resources can be quite difficult. Even if they are financially rich, they may find themselves short of funds at any time and may fall into debt. On the good side 3’s seem to get out of debt just as easily.

Number Four 4

The 4 Money Number will have to work hard for what they get. It is not that they are doomed to be poor, but it doesn’t fall into their lap the way it can for other numbers. On the positive they make excellent savers and know the value of money. Number 4 is the energy and vibration of hard work and building foundations. With dedication and discipline 4 is one of the most likely to succeed through investments and planning.

Number Five 5

Number 5 people are good with business and are able to thrive as long as they stay focused, organized and stick within their budget. Discipline is necessary to really benefit financially through 5 energies. 5’s can be charitable and make great bosses as they treat their employees well and believe that money is to be given away and that is it a renewable source. Number 5 people can be rewarded by the Universe for their good actions and thoughts.

Number Six 6

Number 6 is the possibly the best money number as it is the number of abundance, needs met and the material aspects of life. 6 people sometimes inherit money or share family wealth, as 6 is the number associated with family and gifts. The 6 person usually thrives and succeeds at anything they put their mind and hand to, and almost never has to worry about cash flow. The financial wealth of a 6 is often stable, with no extreme financial highs or lows.

Number Seven 7

Completely eccentric, Number 7 is a bit of a wildcard in relation to money. In the vast majority of cases, it is symbolic of financial challenges, but it can also symbolize significant wealth. The 7 person is generally able to earn significant money, but maybe isn't all that interested in the materialistic side of life and doesn't focus on it. 7's might also strike it rich and make millions from a wild, way-out there idea or two.

Number Eight 8

8 is one of the most financially-oriented numbers and is also one of karma. It symbolizes great wealth on the one hand, but also extreme losses on the other. Often, 8 Number people are plagued with on-going expenses to do with maintaining an expensive lifestyle. It's big bucks, but it can also be big loss and big trouble. 8 is perfectly suited to deal with financial figures, but the saying 'you have to spend money to make money' can be their undoing.

Number Nine 9

Another great money luck number, 9 is a number which easily and effortlessly attracts money, and people with 9 as their Money Number are often said to possess the 'Midas touch'. Number 9 is also the number of the humanitarian and carer, and because of this number 9's often finds it difficult to hold onto wealth for long as the charitable and giving part of them just keeps giving it away. Reaping huge rewards is par for the course with 9.
